About Me

Aspiring Full-Stack Developer | MERN Stack Enthusiast

Passionate student developer specializing in the MERN stack with strong skills in web development and problem-solving. Recently built PicReco, an AI-powered web app for event photo management using facial recognition, cloud storage, and dynamic event sharing. Excited to contribute to innovative projects and apply technical skills to impactful solutions.

Skills

- Creativity
- Digital Marketing
- Critical Thinking
- Leadership

Education

Chavakacheri Hindu College
A/L & O/L

Jan 2012 - Dec 2020

G.C.E. Advanced Level (A/L)
Completed A/Ls in Maths Stream with S grades in ICT

G.C.E. Ordinary Level (O/L)
Achieved B in Mathematics and Science, A in ICT, and S in English.

Uki Coding School
Full-Stack Development Course

April 2024 – Nov 2024

Trained in MERN stack development, building dynamic web apps with features like authentication, payment integration, and Rest full api .

Experience

Sales Marketing Advisor
LOLC Life Assurance, Jaffna

Dec 2021 - Apr 2023

- Developed and implemented marketing campaigns to boost insurance sales.
- Successfully guided customers in financial planning solutions.
- Winner of the Northern Zone Insurance Month Campaign (Sept 2022) - Financial Planner category.

Projects

PicReco
[View Project Link]

PicReco is a web app for event photo management that uses AI facial recognition to sort photos by participants. It includes cloud storage, QR code-based event sharing, and an intuitive interface for photographers and participants. Built with the MERN stack, it ensures scalability and efficient photo handling.

Face Detection App
[View Project Link]

A web app that utilizes OpenCV for real-time human face detection, processing images or video streams to detect and highlight faces. Demonstrates integration of computer vision with web technologies for dynamic face detection applications.
